INTRODUCTION

The Indiana College Substance Use Survey was administered in Spring 2023. A total of 799 Wabash College students were sent an e-mail inviting them to participate in the survey. Students were given a two-week period to complete the online questionnaire. A reminder e-mail was sent midway through the survey period. 142 students responded to the survey, for a response rate of 17.77%. A description of the history and methodology of the Indiana College Substance Use Survey can be found in the *Results of the Indiana College Substance Use Survey, 2023* at <https://collegesurvey.indiana.edu/>. The State Report provides data from students aged 18-25, while the statewide results provided in this report contain data from all students, regardless of age.

Table 1. Response Rate, 2023

Number of students invited to participate	Number of respondents	Response Rate
799	142	17.77%

Three criteria were used to clean the data. Surveys were discarded if any of the following conditions were met:

- insufficient response (less than 26 items answered out of a total of 171 items),
- three or more inconsistent responses among substance use items, and
- pharmacologically-implausible patterns of responses (i.e., a combination of drugs and frequencies of use whose cumulative effect would be lethal).

Table 2. Number of Usable Questionnaires, 2023

	Frequency	Percent
Too few items answered	9	6.3
Inconsistent responses	0	0.0
Implausible drug use	1	0.7
Total Number of Useable Surveys	132	93.0
Total	142	100.0

This report provides analysis of the data by gender and age, as well as overall rates. Responses of students not identifying as male or female are included in the analyses for overall rates and rates by age category, but their responses are not presented in the analyses by gender because of the small number of those students who participated.

PERCEPTION OF PEER BEHAVIORS AND BELIEFS

Students were asked to estimate the percentage of students at their school who drank alcohol in the past month.

Table 14. Perceived Percentage of Students at Your School Who Use Alcohol, by Age, 2023

Perceived percent who use alcohol	All Students		Age	
	School	Indiana	Under 21	21 or older

MENTAL HEALTH

The Indiana College Substance Use Survey asked three questions to assess students' mental health status. Students were asked on how many days in the past month their mental health was not good, including experiencing stress, depression, or problems with emotions. They were also asked if, in the past year, they had experienced feeling so sad or hopeless almost every day for two weeks or more in a row that they stopped doing some usual activities, and if they had ever seriously considered attempting suicide.
